New Jersey Annual Demographic Profile: 1988 to 1990 Supplement

Prepared by:
New Jersey State Data Center
New Jersey Department of Labor
Trenton, New Jersey 08625-0388
July 1991

These tables present updated data from the March 1988, 1988 rewrite, 1989 and 1990 *Current Population Survey (CPS)* to be used as a supplement report to the ***New Jersey Annual Demographic Profile: 1980 - 1988, Prelude to the 1990 Census***, which was published by this office in March 1990.[1]

Between 1988 and 1989, a new computer processing system was introduced for the March CPS. While the March 1989 file is the first to reflect this new processing system, the March 1988 file was reprocessed based on these new procedures in order to: 1) better evaluate the new processing procedures, and 2) allow year-to-year comparisons to be made between income years 1987 and 1988 using a consistent processing system.[2] The reprocessed March 1988 file is known as the **March 1988 rewrite** file.

Since the processing programs were rewritten in 1989, the files from 1989 forward are not only based on a somewhat different imputation system, but also reflect a rewritten weighting system, data acceptance program, family relationship edits, and new procedures to match income supplement records to the monthly CPS files. As a result, it is difficult to ascertain whether differences are the result of imputation or other processing differences between the original and revised files.

---

[1] The U.S. Census Bureau revised and re-issued the March 1989 and 1990 CPS files in May 1991. Some minor modifications were made to the migration, work experience, poverty and occupational classification data.

[2] The reference year for income and poverty is the previous calendar year. e.g., income and poverty status in the calendar year 1989 were reported in the March 1990 CPS.
